PROFILE

Communication & Multimedia Design graduate and freelance web developer running my own studio, EL-Websolutions, since February 2024. I build custom websites and web apps for clients and agencies, mostly with Next.js, Payload CMS, WordPress, and Shopify, and co-founded DICE Label and its spin-off ThedotStudio, building everything from Shopify storefronts to AI-driven lead automation. I also build my own products on the side, like MemoryVault, a digital vault for memories and “open when” messages released to loved ones after they pass away. What ties it together: I build the whole thing myself, from design to development to the process behind it.

EXPERIENCE

EL-WEBSOLUTIONS

Freelance Developer

Running my own freelance practice: building custom websites and web apps for clients, plus white-label development work for agencies.

Jan 2024 - Present

WEBWIJS HEERENVEEN

Full-Stack Developer (Internship)

Improved an existing wireframe file in Figma by adding auto layout, properties, and variables. Helped the development team build a basic webshop template in Magento that met Webwijs's CRO checklist, and built a plugin and website in WordPress using the Oxygen builder.

Feb 2025 - Jun 2025

PROBO DOKKUM

Application & Media Development Intern

Developed an internal application that lets authorized staff log in with their Probo account, and temporarily grant an external device supplier access to their network to resolve issues.

Feb 2022 - Jun 2022

ACS SERVICES

Application & Media Development Intern

Mainly built and maintained websites, and created WordPress templates.

Sep 2020 - Sep 2021

FEATURED WORK

- MemoryVault: a digital vault for memories and "open when" messages, released to loved ones after they pass away.
- DICE Label & ThedotStudio: co-founded studio spanning Shopify storefronts to AI-driven lead automation.
- A handful of game design and behavioral-research projects from my studies.
